

BOOK YOUR FAVORITE SPORTS COURTS WITH SPORTCOURTS — UX/UI CASE STUDY

SportCourt for Player

SPORTCOURT

SPORTCOURT IS A WEB-BASED SPORTS COURT BOOKING PLATFORM DESIGNED TO SIMPLIFY THE PROCESS OF DISCOVERING AND RESERVING SPORTS FACILITIES. THE PLATFORM ENABLES USERS TO SEARCH FOR COURTS, COMPARE VENUES, CHECK AVAILABILITY, AND COMPLETE BOOKINGS THROUGH A CLEAN AND INTUITIVE INTERFACE.

DESIGN GAOL

THE GOAL OF THIS PROJECT WAS TO CREATE AN EFFICIENT BOOKING EXPERIENCE THAT ALLOWS USERS TO:

- DISCOVER NEARBY SPORTS COURTS
- SEARCH AND FILTER COURTS BASED ON THEIR PREFERENCES
- VIEW DETAILED FACILITY INFORMATION
- CHECK REAL-TIME AVAILABILITY
- BOOK COURTS WITH A SIMPLE AND INTUITIVE WORKFLOW
- MANAGE BOOKINGS WITH CONFIDENCE

DESIGN PROCESS

RESEARCH

I ANALYZED COMMON SPORTS BOOKING PLATFORMS TO UNDERSTAND HOW USERS SEARCH FOR VENUES AND RESERVE COURTS. THE RESEARCH FOCUSED ON REDUCING BOOKING COMPLEXITY AND PRESENTING IMPORTANT INFORMATION IN A CLEAR VISUAL HIERARCHY.

INFORMATION ARCHITECTURE

THE PLATFORM ORGANIZES INFORMATION INTO LOGICAL SECTIONS, ALLOWING USERS TO MOVE NATURALLY FROM DISCOVERING COURTS TO CONFIRMING RESERVATIONS WITHOUT CONFUSION.

- SERVICES
- COURT LISTINGS
- BOOKING FORM
- BOOKING SCHEDULE
- COURT DETAILS
- BOOKING CONFIRMATION

PAGE

HOME, ABOUT, SERVICES & CONTACT

THIS COLLECTION OF SCREENS SHOWCASES THE COMPLETE USER JOURNEY OF SPORTCOURT, FROM EXPLORING THE PLATFORM AND LEARNING ABOUT ITS SERVICES TO BROWSING AVAILABLE SPORTS COURTS AND COMPLETING A RESERVATION. THE DESIGN FOCUSES ON CREATING A SEAMLESS AND INTUITIVE EXPERIENCE WITH CLEAR NAVIGATION, CONSISTENT LAYOUTS, AND AN EFFICIENT BOOKING FLOW THAT HELPS USERS ACCOMPLISH THEIR GOALS WITH MINIMAL EFFORT.

COURT

THE COURT PAGE IS DESIGNED TO HELP USERS DISCOVER AND COMPARE SPORTS COURTS THROUGH A CLEAN, ORGANIZED, AND EASY-TO-NAVIGATE INTERFACE. USERS CAN BROWSE AVAILABLE COURTS, VIEW ESSENTIAL INFORMATION SUCH AS COURT TYPE, LOCATION, PRICING, OPERATING HOURS, AND FACILITY DETAILS, ALLOWING THEM TO MAKE INFORMED DECISIONS BEFORE BOOKING. A CARD-BASED LAYOUT WITH CLEAR VISUAL HIERARCHY IMPROVES CONTENT SCANNING, WHILE SEARCH AND FILTERING FEATURES ENABLE USERS TO QUICKLY FIND COURTS THAT MATCH THEIR PREFERENCES. THE INTERFACE EMPHASIZES SIMPLICITY AND USABILITY, REDUCING THE TIME AND EFFORT REQUIRED TO EXPLORE AVAILABLE OPTIONS AND PROCEED CONFIDENTLY TO THE BOOKING PROCESS.

BOOK PROCESS

THE BOOKING FLOW USES A TWO-STEP PROCESS TO SIMPLIFY COURT RESERVATIONS. USERS FIRST PROVIDE THEIR BOOKING DETAILS AND PREFERENCES, THEN PROCEED TO A SECURE PAYMENT SCREEN TO COMPLETE THEIR RESERVATION. PROGRESS INDICATORS, ORGANIZED FORMS, AND CLEAR ACTIONS CREATE AN INTUITIVE AND SEAMLESS BOOKING EXPERIENCE.

MY DESIGN PROCESS

WIREFRAMING

I BEGAN THE DESIGN PROCESS BY RESEARCHING WEBSITE LAYOUTS AND WIREFRAME EXAMPLES TO UNDERSTAND COMMON UI PATTERNS AND CONTENT STRUCTURE. USING THESE REFERENCES AS INSPIRATION, I CREATED A LOW-FIDELITY WIREFRAME THAT ESTABLISHED THE LAYOUT, INFORMATION HIERARCHY, AND USER FLOW BEFORE MOVING INTO HIGH-FIDELITY DESIGN.

AFTER FINALIZING THE WIREFRAMES AND OVERALL LAYOUT, I BEGAN CREATING A REUSABLE COMPONENT LIBRARY FOR THE WEBSITE. THIS HELPED ENSURE CONSISTENCY, IMPROVE SCALABILITY, AND SPEED UP THE DESIGN PROCESS ACROSS ALL PAGES.
